Comstock Bobcat/Fox Traps

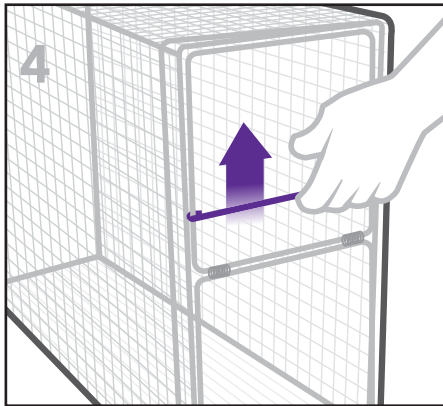

- | | | |
|-----------------------|-------------------------|-----------------------|
| A Trigger Rod | D Swing Bar Rest | G Bi-fold Door |
| B Trigger Stop | E Trigger Pin | H Door Hook |
| C Swing Bar | F Door Lock Bar | |

Set the Swing Bar

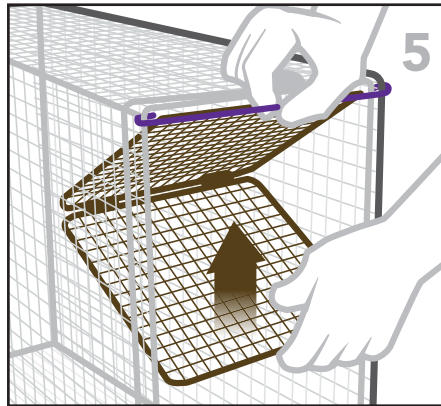

1. Locate the **(C)** Swing Bar and move toward the side of the trap temporarily, so it doesn't interfere with the **(B)** Trigger Stop.
2. Rotate **(A)** Trigger Rod up using the **(E)** Trigger Pin at the other end of the trap.
3. Rotate swing bar back so that it is perpendicular to the side of trap. Drop the **(B)** Trigger Stop until it sits on the **(D)** Swing Bar Rest located at the top of the Swing Bar.

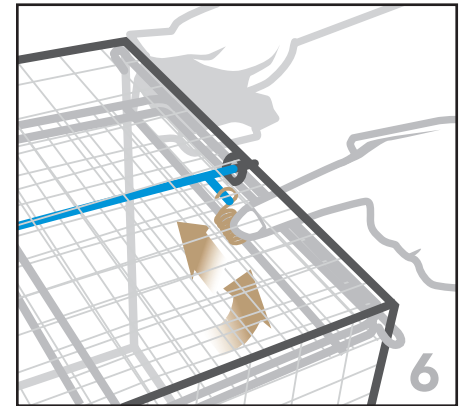

Set the Door

4. Locate the **(F)** Door Lock Bar. Slide to top of trap frame.

5. Push in the center door hinge while lifting from the bottom to fold the **(G)** Bi-fold Door in half. Lift door to top of trap.

6. While holding the door open with one hand, use other hand to align and roll the **(H)** Door Hook over the Trigger Pin. The trap door is now set. For double door traps, repeat steps with the other door.

DEPENDABLE. TOUGH.
