Squirrel / Rodent Removal Kit

Repeating Trap fitted to a One Way Excluder

The rodent removal kit is very easy to set up and is effective at catching multiple rodents per setting. The kit comes with one excluder and one extension repeating trap.

To set the kit attach the excluder over the animals entry/exit hole using heavy duty staples, tack nails or screws. Slide the repeating trap over the excluder and attach it with the roll hook on the trap. To release trapped animals remove the trap from the excluder by unfastening the roll hook then remove the rear sliding door. After all animals have been excluded remove the excluder and seal the exit/entry hole so animals do not return. Each part is also available for individual purchase.

Thank you for your purchase!
