Excluders

We offer two styles of animal excluders in many different sizes. Excluders are easy to install and work great for animals that have worked themselves into unwanted areas such as walls. Use screws, nails or heavy duty staples to attach the excluder over the entry/exit hole so that animals may exit though the excluder but cannot return.

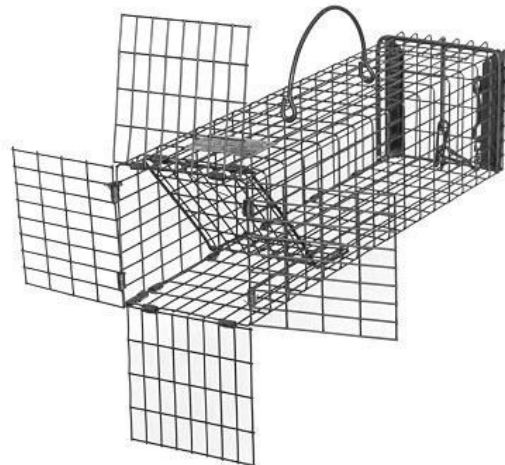

Excluder with One Way Door

Excluders are equipped with four wings that are moveable for easy attachment over animal holes in structures. The wings are easily attached with screws, nails or heavy duty staples. As animals exit they are able to push through the one way door on the excluder removing themselves from unwanted areas.

Deluxe Excluder with One Way Door and Easy Release Door

The deluxe model works the same as a standard excluder but comes equipped with an easy release door allowing you to also use it as a trap. Leave the door on to use it as a repeating trap or remove the rear door to use it as a true excluder.

Thank you for your purchase!
